PROFILE SUMMARY

Solution focused and self-motivated young profession with inherent interest in software engineering industry. Proficient in a variety of languages with in-dept knowledge in front end and backend web development. Familia with database designs and development. Ability to develop data structure and algorithm. Quick to learn and master new IT trends and technologies. Skilled at team collaboration while working independently in remote environment using appropriate version control system. Adaptable by nature, flexible and open to changing arrangements at short notice.

TECHNICAL SKILLS

- **Front End Web Development:** HTML, Bootstrap, CSS, JavaScript, React
- **Database Management:** PHP, MySQL, Laravel
- **Wireframe:** Balsamiq mock-up
- **Version Control:** Git & GitHub
- **Microsoft Office Package:** Word, PowerPoint, Excel, Access.

CORE COMPETENCIES

- | | | |
|-----------------------------------|-------------------------|-------------------------------|
| • Flowcharts and process diagrams | • Programming Knowledge | • Wireframing |
| • Software Designs | • Front End Development | • Database Management |
| • Need Assessment | • Code readability | • Reporting and Documentation |
| • Frameworks | • Operation Improvement | • Object oriented programming |

EDUCATION

- **B.AgricAgricultural Economics, Extension and Rural Development** – Niger Delta University, Bayelsa **2018**
 - Second Class Upper Division
- **Relevant Couse:** Introduction to computer programming C++
- **Course Project:** Simple calculator

CERTIFICATION

- **Software Engineering, DufunaCode Camp** **Oct. 2019**

EXPERIENCE

Software Developer – HNG Internship **Mar.2020 – Present**

- collaborate closely with other team members on an assigned project.
- writing and implementing efficient code.
- detect and track software defect and inconsistencies.
- Enhancing applications by identifying opportunities for improvement and making recommendations.

Telemarketer – C and I Leasing Plc.

Jun.2016 – Aug. 2018

- Sourced and registered patrons.
- Called potential customers using dedicated telephone systems and introduced self and the company.
- Provided information regarding the company and the services provided; gauged potential customers' interest.
- Assisted potential customers in understanding product lines and after sales services.
- Asked pertinent questions regarding customers' interest in a product or service.

PROJECTS

- **Secured Registration and login page with Email notification**
- **Online credit card payment system (clone)**
- **E commerce product page**
